

PRESS RELEASE
July 2023

Masterly and up-to-date

The new Meister feine Chronoscope MEGA Solar by Junghans offers modern technology in classic design.

Up-to-date technology, stylish appearance, and marvelously intuitive handling: The Meister feine Chronoscope MEGA Solar showcases the particular design and technology competence of Junghans. Technologically, this new timekeeper convinces with its in Schramberg developed radio-controlled solar movement including an accompanying app; the design is dominated by the in every respect fine lines that also gave this model range its name.

Technically. Precise.

Under the domed translucent dial, modern app-connected RC solar technology provides precise, reliable timekeeping. Powered by the inexhaustible energy of the sun, and equipped with a perpetual calendar as well as the automatic change from daylight time to standard time, one can always rely on the Meister feine Chronoscope MEGA Solar. The easy adjustability of time zones via the crown or smartphone provides unlimited time comfort even in remote locations.

When using the handy chronograph function, the totalizers at 12 and 6 o'clock inform about stop second and minute, and otherwise serve as small second as well as date and radio-reception displays.

A glance through the display back reveals the technical side of the watch, presenting the RC solar movement developed and manufactured in Schramberg. Without seams and slightly domed, the leather straps in black and dark brown consistently continue the case geometry around the wrist, and complete the high wearing comfort of the slim chronograph.

Simply. Sophisticated.

Spherically cut sapphire crystal and a case made of polished stainless steel – or with a warm rose-gold shade – give the chronograph a slim silhouette. Long hour marks, fine bar hands, and the vertically aligned totalizers convey clear symmetry on the dial. The subdials combine several functions into a clear display. Using the Meister feine Chronoscope MEGA Solar is comfortably simple – which makes the timepieces even more special.

Finely designed, intuitive to use, at the same time versatile in its functions, and technically leading the way – simplicity is said to be the absolute sophistication. The Meister feine Chronoscope MEGA Solar shows in particularly impressive manner that this principle continues to be true.

Meister fein Chronoscope MEGA Solar Features

59/4200.00

59/7201.00

- Movement:** Connected RC solar movement J110 with small second
- highly efficient energy management
 - smart time adjustment with the Connected function of the Junghans MEGA app (Apple App Store and Google Play Store)
 - adjustment of all time zones to the precise second
 - energy-saving mode
 - dark power reserve up to 3 years
 - perpetual calendar
 - radio reception in Europe, UK, Japan and USA
- Functions:** date, stop function with minute- and second-counter, radio reception indication
- Case:** polished stainless steel or rose gold colored PVD coating
 Ø 39.5 mm, height 9,5 mm, 4-times screwed case back with tinted mineral crystal
- Glass:** domed sapphire crystal with anti-reflection coating on both sides
- Dial:** domed solar dial matt white
- Hands:** fine bar hands
- Strap:** domed leather strap black (ref. 59/4200.00)
 dark brown (ref. 59/7201.00)
 stainless steel or rosé gold colored PVD-coated buckle

About Junghans

Junghans has been giving a face to time for more than 160 years. The attention to detail, the high demands on design and quality and generations of technical expertise have characterized the products of Uhrenfabrik Junghans since it was founded in 1861. Values that form the foundations for the success story of the company from Schramberg in the Black Forest. In 1903, Junghans had already been the largest clock manufacturer in the world, with over 3,000 employees, manufacturing more than 9,000 timepieces a day. The development of precision movements made the company the largest manufacturer of chronometers in 1956. In the 1960s to 1980s, the Black-Forest manufacturer with tradition chronometrized numerous big top-class sports events and set standards in sports timekeeping with the development of several technical innovations. After an eventful and turbulent company history, the Schramberg businessmen Dr. Hans-Jochem and Hannes Steim became the new proprietors of the venerable company in 2009, ensuring a new era of growth. In 2022, Hannes Steim joined the operational business as managing partner, and is running the Uhrenfabrik together with CEO Matthias Stotz now. Junghans still conceives, designs, constructs, and produces all of its watches on the historical company site. In 2018, the terrace building has been revived for its 100th birthday. In this monument to industrial architecture, long the light-flooded centerpiece of Junghans watch production, the tradition of watch and clockmaking in the Black Forest can be experienced in the form of a museum. The current collection also references the long tradition of the company in design and watchmaking - transported to the present in contemporary form. For example, with the Meister watches, which have been at the core of the collection since the 1930s, or the timepieces of the Max Bill line that have been created in collaboration with the Swiss designer since 1956. In 1990, Junghans reached a milestone in striving for precision with the invention of the first radio-controlled wristwatch. Today, this technology Made in Schramberg meets the highest standards with regard to time comfort, precision, and energy efficiency with a new generation of app-connected radio-controlled solar movements. The clear design language of the Junghans watches has been a constant factor throughout the history of the company. The latest indication of this can be found in the models of the FORM line standing for German industrial design with matter-of-fact simplicity. For more than 160 years now, Junghans timepieces have combined watchmaking tradition, design and technology expertise. For personality starts on the wrist.
