August 2023

Time to show your true colours

The new Meister feine Automatic models by Junghans invite to shape time according to your own colours

The new Meister feine Automatic models by Junghans bring the feeling of irresistible joy and vibrancy to the wrist. These timepieces combine expressive colour schemes with fine lines, elegant details, and high-quality features.

As colourful as life itself

Bold, creative, and colourful – the models in petrol & arctic blue, moss & apple green, as well as blackberry & pink attract attention. Depending on how the light falls upon it, the domed sunburst dial shimmers in different shades. The elongated hour markers and the vertical logo integration at six o'clock convey modern straightforwardness. The twelve o'clock index shines elegantly with its eight encased diamonds and fits perfectly into the clear symmetry.

Complementing the dial, and in the colour of hour markers and date display, the corresponding leather straps complete the harmonious and expressive appearance of this watch trio. With a glimpse through the ergonomically shaped display back, showcasing the decorated automatic movement, it becomes evident that the models not only know to impress with their external qualities.

Thanks to their modern size with a case diameter of 39.5 mm, double-sided anti-reflective sapphire crystal, water resistance up to 5 bar, and quick-release straps, these timepieces are as colourful as life itself and perfectly prepared for all its facets.

Expressive, intricate, and sophisticated: the new Meister fein Automatic embraces colour – and brings joy to one's wrist.
