Sophisticated Masterpieces

**Highest standards for design and quality:
The new Meister women's watches by Junghans.**

An elegant design, carefully selected materials and fine watch mechanics – there are formulas for success that never lose their relevance. From its inception almost a century ago, it has been thanks to these exact qualities that the Meister line has represented the centrepiece of the Junghans collection. Now, three new women's models are interpreting the watch classic each in their very own way – wonderfully modern and full of variety.

Meister Damen Automatic – Expression of true Individuality

Exquisite materials, exquisite details: The new Meister Damen Automatic fascinates at first glance. But also, at the second. Because both timepieces are – in every way – extraordinary pieces of jewellery.

The polished case features the gently curved contours typical of the Meister. Thanks to a fine sunray brush, both variants reveal a fascinating brilliance, evolving from the centre of the dial. Diamond-cut dauphine hands and delicate hour markers complete their elegant appeal.

Depending on how light falls upon it, the dial exudes nuances from saturated fir green to deep emerald. Running along the bezel, 60 individually placed diamonds create an exquisite minute track.

Floral characteristics shape the second Meister Damen: Its silver-plated dial is graced with a gentle pink leaf pattern, perfectly harmonizing with the colour of the strap and its polished case.

The ostrich leather straps distinguish themselves by their soft look and comfortably light feel on the skin. Unique textures provide each strap with true individuality. The new Meister Damen Automatic models and their wearers alike are fascinating with inimitability.

Meister Automatic – Elegance in a new Dimension

The new Meister Automatic is fully equipped to take on every facet life has to offer. And – just like its wearer – makes a bold appearance in each and every situation. With its pointed hands, distinct silhouette of the polished stainless-steel case and eminently domed sapphire crystal, the watch captures the classic elegance of the Meister line.

At the same time, the design of the dial is captivating in every detail: In a gentle green tone, the leaf structure graces the silver-plated sunray brush. The modern size, the self-winding movement and the cool stainless-steel bracelet all leave no doubt: This Meister goes through life with determination.

Meister Damen Automatic Features

27/3240.00

27/3242.00

- Technology:** Self-winding movement J840.1 with a power reserve of up to 38 hours
