November 2019

Fire and Ice – Winter Magic on Your Wrist.

The air is clear as crystal and wonderfully fresh. Light wisps of condensation appear each time you exhale and the snow scrunches quietly underfoot. On these cold winter days, the world seems to briefly stand still. You want to pause the scene, to maintain this precious moment. Time becomes magic.

The timepieces from Junghans reflect this magic in their design. Snow white dials are contrasted with cool stainless steel and ice-grey elements. In addition, the watches emanate a delightful overall style – embodying the serenity of this contemplative time of year.

Winter is portrayed in cool colours during the day, and as night falls the lights begin to take on a golden hue. The elegant Junghans Meister models bring this cosy warmth to your wrist: Case, hands and indices sparkle in soft golden tones and the soft leather strap exudes classic style. Elements which draw in the observer as if from a blazing open fire.

Bitter cold and cosy warmth: the timepieces from Junghans are symbolic of winter charm. When time becomes magic.

Product Descriptions
