

PRESS RELEASE
July, 2020

To the Beat of the Big City.

The Force Mega Solar from Junghans combines precise time technology with resilient materials. A sustainable design for the urban Zeitgeist.

Time affords us an enormous amount of pleasure, if we could only decide of our own free will how it should be formulated. The new Force Mega Solar models from Junghans are inspired precisely by this sense of freedom. Innovative time technologies, state-of-the-art design and stylish colours symbolize the urban Zeitgeist.

Resilient ceramic and titanium materials guarantee maximum wear comfort and establish the Force Mega Solar as the ideal companion for all situations encountered on an everyday basis. Even the risk of scratching while pursuing sporting activities is no longer a concern: A premium grade ceramic case with sapphire crystal provides reliable protection for the glass solar cells, as well as for the movement - developed and crafted in Schramberg - within the watch. Resilient and water resistant, the comfortable lightweight rubber strap is available in sharply contrasting black, stylish brown or contemporary khaki. The PVD-coated titanium folding clasp guarantees a secure fastening.

With the invention of the first radio-controlled solar watch in the world in 1993, Junghans devised a convenient system which eliminated the need for setting or charging the watch. This technical luxury is still appreciated by watch aficionados to this day. A perpetual calendar, automatic changeover of the multi-frequency radio-controlled movement from summertime to winter time, as well as compatibility with the user-friendly MEGA App contribute toward a remarkable time comfort across the globe. This is all accomplished with maximum efficiency: An intelligent sleep mode ensures a power reserve of nearly two years for the solar-powered movement.

Forge your own time entirely at your leisure. Leave the constraints of everyday life behind you and open up to a whole new world of possibilities. Effective time technologies, premium grade materials and a completely modern look – the new Force Mega Solar models exemplify the sense of urban freedom.

Force Mega Solar Features

018/1000.00

018/1001.00

018/1002.00

- Movement:** Multi-frequency radio-controlled solar movement J615.84
Big date display, perpetual calendar, App-connected automatic reception of time signal transmitters DCF77, MSF, JJY40/60, WWVB60, power reserve up to 21 months, automatic sleep mode after 72 hours without exposure to light
- Case:** Ceramic, polished or matt finish, Ø 40.4 mm, height 8.2 mm
Sapphire crystal, 4-times screwed ceramic case back
- Dial:** Glass solar cells
Dial markings with environmentally-friendly Superluminova luminous substance in white, brown or khaki
- Hands:** With environmentally-friendly luminous substance
Second hand with environmentally-friendly Superluminova luminous substance
- Strap:** Synthetic rubber strap with titanium buckle, PVD-coated
- Water-resistance:** Up to 5 bar
